

READ ME, PLEASE.

Handle with care

These logos are for you to keep. It's worth deleting your old ones in case they have been modified over the years.

We have included a selection of our new colours, leaving out some which are harder to work with.

Don't forget - NEVER scale up a logo. If you need something bigger, ASK!

Also be really careful with proportions - always scale down from a corner so you don't skew or squish the logo.

Enjoy working with our new world of colour, just remember that less is usually more. There's advice on colour combinations in the Playbook, take a look!
