

For Circulation Amongst Customers Only

Iteration One	
Give the animal four legs	Each leg is at least two blocks high. These are the only parts of the body that touch the ground. Conflicting story.
Make an enclosure for the animal	
Make your animal move across the desk	The legs can have wheels. A rolling animal is also acceptable.
Give your animal wings	The wings should be symmetric.
Give your animal a head	Just has to look like a head, with a distinct neck.
Make sure your animal has at least two eyes	At least 2 blocks high, but only one block thick. They should also be symmetrical
Make your animal one colour	Mostly the same colour blocks. Some blocks of other colours accepted.
Give the animal two legs	Each leg is at least two blocks high. These are the only parts of the body that touch the ground. Conflicting story.
Give your animal two arms	At least 2 blocks high, but only one block thick. They should also be symmetrical
Iteration Two	
Make a baby version of the animal	The baby animal just has to look broadly similar to the parent, but can miss some elements of the parent at the customer's discretion.
Give your animal stripes	If the animal looks stripy that is fine. Don't care about the details.
Make a cart for the baby	Something that looks like a cart. The baby animal may or may not be able to sit on it. The cart should be moveable.
Make the animal at least 4in high	The total height of the animal should be at least 4in.
Make the animal at least 4in long	The total length of the animal is at least 4in.
Put a roof on the enclosure	The roof could be in the form of bars across the enclosure. Minimum 2 bars
Enlarge your enclosure to take the baby	Both the animals should fit in comfortably. They should not touch each other or the enclosure.
Enlarge the enclosure to take your 4 by 4 animal	The animal should fit in comfortably. It should not touch the enclosure.
Give the animal 6 legs	Each leg is at least two blocks high. These are the only parts of the body that touch the ground.
Give your animal a second head	Just has to look like a head, with a distinct neck
Iteration Three	
Put a gate on the enclosure	The gate needs to be distinct from the enclosure. Should be at least one block higher than the enclosure.
Make the enclosure 3 blocks high	The enclosure should be three blocks high.

Wait until they come to you.

Ask why some cards are high estimates when they've already done similar work
