H & C

Hopes

- Best practices like pairing, TDD
- Estimation with some real examples
- As a tester, how I can be contribute to development phase
- How can these practices help me achieve best results
- When, Where & How to apply pair programming
- Agile project management
- provide proper estimates during development
- Learn practices which can be applied immediately on projects
- Functional automation

Concerns

- Didn't attend fundamentals of agile training
- How will it improve my efficiency at work
- TDD, Mocking, BDD will be complex, extra effort apart from coding business logic
- How is agile best suitable for development and support projects compared to other methodologies
- Converting story points into hours and schedules
- How to use these practices in real projects
- Limited knowledge in spring and struts
- Challenges in Agile estimation
- How to test real integration with other systems, if only basic testing at unit levels using mocks
- Object setups in unit testing can be tedious
- Nature of sprints
  - diversified work items
  - feature backlogs
  - defect backlogs
